

Cart Path Only

According to the Hong Kong Observatory data*, there is 50% rainfall more than the average in May 2022. Our Golf Course Maintenance team is trying the best to maintain the golf course conditions during the extremely wet weather while we found the turf was damaged by ruts.

Please be reminded that golfers **MUST** keep their golf carts on the designated cart paths at all times, and any infraction will result in the issue of an official warning letter.

We are seriously concerned that the deteriorating situation in golf course as the result of the turf damaged, the Club may consider to close the golf course for further maintenance programs if necessary.

Thank you for your attention.

**According to the Hong Kong Observatory data, May 2022 was also wetter than in previous years with a total rainfall of 436.5mm, about 50 % more than the average 290.6mm.*
