

# **Commitment to Environmental Sustainability**

As part of our ongoing commitment to environmental sustainability, starting from 22 April 2024, we are implementing a new initiative to promote environmental sustainability within our club that encourage responsible use of takeaway containers and disposable cutlery.

We will be applying a small charge to members who request extra takeaway containers or disposable cutlery. The charge will be HK\$5 per takeaway container and HK\$3 per set of disposable cutlery. Please note that this charge does not apply to takeaway orders.

We kindly request your support in embracing this initiative as it helps us reduce our ecological impact and work towards a cleaner and greener future.

We appreciate your understanding and willingness to adapt to this change.
